

```
1  class Calculator
2  {
3      void main(int x,int y,char s)
4      {
5          System.out.println(x+" "+y);
6          if(s=='+')
7              System.out.println(x+y);
8          else if(s=='-')
9              System.out.println(x-y);
10         else if(s=='*')
11             System.out.println(x*y);
12         else if(s=='/')
13             System.out.println(x/y);
14     }
15 }
16
```
